For your 2015 Community Profile, it may be helpful to know how breast cancer affects specific populations such as African Americans, Latinas, younger women, etc. An Affiliate may choose to use some of this information to explore these populations further, or use this information to make comparisons between the national figures and those for an Affiliate service area or county.

For basic information on breast cancer in these populations, visit Komen’s website by clicking on the link below:

- African American women
- Asian American and Pacific Islander women
- Hispanic/Latina women
- American Indian and Alaskan Native women
- Lesbian, gay, and bisexual women
- Younger women

For more detailed information on breast cancer’s effects on African Americans, Hispanic/Latinas, men, and younger women, go to myKomen (Mission-Community Health-Breast Cancer Education-Resources-Breast Cancer Facts and Education Documents).
